

## HIPAA Security Software Program Program Overview

The Health Insurance Portability and Accountability Act (HIPAA) Security Regulation creates a number of challenges that covered entities must address related to security as well as data storage and retrieval. Some of these challenges can be met by conducting an effective assessment or gap analysis and structuring appropriate security and storage policies. Supporting these policies, however, with the addition of technology can reduce cost and improve effectiveness, significantly. Computer Associates has enhanced its industry leading security and storage management solutions to help covered entities address these challenges more efficiently. The American Hospital Association has recently exclusively endorsed Computer Associates for selected technologies to help hospitals achieve compliance with the HIPAA Security rule.

**Our Approach.** Computer Associates focuses on helping healthcare organizations manage an appropriate balance between the need for information security and convenient access to information in the clinical and administrative environment. This approach focuses on three specific functions to help organizations comply with the HIPAA Security Requirements:

- **Access Controls** – Establishing, enforcing, and monitoring appropriate access rights in a way that does not interfere with convenience to the user.
- **Electronic Defense** – Protecting against attacks, threats or hazards to the security and integrity of electronic protected health information.
- **Administrative Compliance** – Monitoring and managing enterprise-wide security policies and events from a central console and enable real-time incident response and reporting.

**Key Solutions.** Key solutions available for hospitals through this program include:

- **eTrust Single Sign On (SSO)**
- **eTrust Intrusion Detection**
- **eTrust Access Control**
- **eTrust Audit**
- **eTrust Admin**
- **eTrust Antivirus**
- **eTrust Web Access Control**
- **eTrust Directory**
- **eTrust OCS Pro**
- **eTrust PKI**
- **BrightStor Portal**
- **BrightStor Storage Resource Manager**
- **BrightStor Enterprise Backup**
- **BrightStor ArcServe Backup**

**Benefits of Computer Associate's Tools.** The benefits of our solutions are immediate:

- **Provide** authorized users with **secure yet convenient access** to critical information
- **Protect** against threats to the **security and integrity** of electronic protected health information
- **Ensure** the **integrity and availability** of electronic protected health information
- **Reduce** administrative **costs** of managing compliance with the HIPAA Security Regulations

*To assist American Hospital Association (AHA) member organizations in complying with HIPAA Security regulations, the AHA has exclusively endorsed solutions from two suites of Computer Associates software: eTrust and BrightStor. Computer Associates has the software to meet a wide range of security needs – from single sign on to monitoring access controls and intrusion detection as well as managing complex and diverse storage environments.*
