RACTracsupport@providercs.com or 1-888-722-8712

RACTrac Question (As they appear on the Survey)	User Definition	Vendor Notes (VNote) and Comments
Overpayments – Automated		
<p>Have you experienced RAC Activity? Yes or No</p> <p>If yes, please tell us the date and month in which activity started.</p>	<p>Being notified by the Medicare Recovery Audit Contractor (e.g. DCS, HDI, CGI or Connelly Associates) would include correspondence of either a medical record request or a demand letter.</p>	<p>Comment: The user is prompted to answer this question every quarter until the response is YES.</p> <p>The date of the start of RAC activity is captured in the AHA admin reports.</p>
<p><input type="checkbox"/> Check here if your hospital is not tracking automated claim denials</p> <p><i>If checked skip to Overpayments – complex RAC Reviews.</i></p>	<p>By checking this box you have indicated that your organization is not currently tracking automated claim denials. By checking this box you will skip this section and immediately move to the next section of the survey.</p>	<p>Comment: This is captured in the Status report available to state, regional and metropolitan association and health system RACTrac users.</p>
<p>1. Total cumulative number of automated claim denials</p>	<p>Automated review occurs when a RAC makes a claim determination without a human review of the medical record. RACs use proprietary software that is designed to detect certain types of errors including but not limited to duplicate payments, billing or coding errors. The RAC notifies the provider via a demand letter when an overpayment has been identified through automated review.</p> <p>Report the <u>total cumulative</u> number of claims denied through the automated review process through the end of the quarter for which you are reporting. Each claim identified as having an overpayment will count once.</p>	<p>VNote: Often times the provider will get one demand letter that will reference several claims identified as overpayments. <u>Each claim</u> - not the number of demand letters - counts as an automated claim denial.</p>
<p>2. Total cumulative automated claim denial Medicare reimbursement dollar amount (sum of all demand letter amounts)</p>	<p>Report the <u>total cumulative</u> estimated dollar value of the claims denied through the automated review process through the end of the quarter for which you are reporting. The estimated dollar value is indicated on the review results letter and on the demand letter from the RAC.</p>	<p>VNote: The word “estimated” remains in this question because sometimes the letters do not necessary match the dollars recouped. The dollar amount of an overpayment should be clearly stated in the RAC demand letter.</p>
<p>3. Total cumulative Medicare reimbursement dollars recouped for automated claim denials</p>	<p>Report the <u>total cumulative</u> dollars that have been recouped pursuant to a RAC automated claim denial, without regard to appeal activity. Include only <u>actual dollars returned</u> to Medicare program by your organization from the date your facility was first affected thru the end of the quarter for which you are reporting. Do not include estimated recoupments for automated denials that have not yet been processed or for those denials in which you have filed an appeal within 30 days and therefore stopped recoupment from occurring.</p>	<p>Comments: The claims processing contractors (FI/MAC) have been known to be delayed in processing the overpayments. Regulations now state that the provider can stop recoupment from occurring if filing an appeal within 30 days. Therefore we would only be asking for the actual total dollars recouped to date at the time hospitals are reporting data.</p>

RACTrac Question (As they appear on the Survey)	User Definition	Vendor Notes (VNote) and Comments
<p><input type="checkbox"/> Check here if your hospital has had no new activity this quarter.</p> <p>(If checked, skip to Overpayments-Complex RAC Reviews)</p>	<p>RACTrac is a quarterly survey and from time to time, there will be no new activity for hospitals between quarters. If data was reported in quarter one, but there is no new activity in quarter 2, the hospital should reenter the data from quarter 1 into questions 1, 2 and 3 as those numbers remain the same and check this box to denote that there were no subsequent denials to be indicated in this quarter.</p>	<p>VNote: The survey tool does not carry forward data from the previous quarter. The only way it will be captured from quarter to quarter is if the hospital responds to the survey every quarter and reenters their data or notes in this checkbox, that there was no new activity in the requested quarter.</p>
<p>4. Indicate the service areas in which automated RAC denials have occurred <u>this quarter</u>.</p> <p>Please select you hospital type in 4a and then indicate the services in which automated RAC denials have occurred for your hospital <u>this quarter</u> in 4b. <u>Check all that apply.</u></p>	<p>Medicare claim denials from the RACs can fall in any number of service areas of the hospital. The choices presented allow the hospital to first associate itself a type of hospital listed in 4a and then indicate all the service areas within that hospital that experienced Medicare claim denials through the automated review process <u>this quarter</u>.</p> <p>Example: An Inpatient Rehabilitation Hospital had outpatient automated denials as well as inpatient automated denials this quarter. In 4a the selection would be Inpatient Rehabilitation Hospital and 4b the selection would be both inpatient and outpatient.</p> <p>NOTES – Definitions Below</p> <p>4a: Hospital Type:</p> <ul style="list-style-type: none"> ▪ Medical/Surgical Acute Care Hospital (includes Critical Access Hospitals) ▪ Inpatient Rehabilitation Hospital ▪ Psychiatric Hospital ▪ Long Term Care Hospital <p>4b. Service Areas (Dependent on selection in 4a)</p> <p>Medical/Surgical Acute Care Hospital (including CAH's)</p> <ul style="list-style-type: none"> ▪ Inpatient ▪ Outpatient ▪ Psychiatric Services ▪ Inpatient Rehabilitation ▪ Skilled Nursing - (No corresponding denial reasons) ▪ Other (i.e. Physician services, DME) <p>Inpatient Rehabilitation Hospital</p> <ul style="list-style-type: none"> ▪ Inpatient ▪ Other <p>Psychiatric Hospital</p> <ul style="list-style-type: none"> ▪ Inpatient ▪ Other 	<p>The user must first associate them self with the type of facility and then check the appropriate services that were affected by the automated RAC Activity.</p> <p><i>Hospital type definitions noted below in gray.</i></p> <p>VNote: At this time we do not have any corresponding reasons for denial should it occur in the skilled nursing unit of a medical/surgical acute care hospital.</p>

MAY 2012**

Contact RACTrac Support with Questions:
RACTracsupport@providercs.com or 1-888-722-8712

	<p>Long Term Care Hospital</p> <ul style="list-style-type: none"> ▪ Inpatient ▪ Other 	
Data definitions for Hospital Types For All of AHA RACTrac Hospital Type Questions		
Medical/Surgical Acute Care Hospital	Medical/Surgical Acute Care Hospitals include critical access hospitals, cancer hospitals, specialty med/surg hospitals (surgical, women’s, cardiac, orthopedic, etc.), children’s hospitals and federal or state run hospitals that provide medical/surgical acute care services. These hospitals may have several distinct part units including skilled nursing, inpatient rehabilitation and swing beds, but the majority of services are provided in the inpatient or outpatient settings of these hospitals.	VNote: RACTrac is currently <u>not</u> seeking data from free standing skilled nursing facilities or ambulatory surgery centers that may be owned or operated by the hospital or health system.
Inpatient Rehabilitation Hospital	Freestanding inpatient rehabilitation hospitals are those that are paid under the Medicare inpatient rehabilitation perspective payment system and primarily provide inpatient and outpatient rehabilitation services to patients.	
Psychiatric Hospital	Freestanding psychiatric hospitals are those that are paid under the Medicare psyche perspective payment system and provide primarily inpatient psychiatric services to patients.	
Long Term Care Hospital	Freestanding long term care hospitals are those paid under the Medicare long term care perspective payment system. CMS defines a long term care hospital as one which has an average inpatient length of stay greater than 25 days.	
<p>5. Rank order the services by the number of automated claim denials this quarter.</p> <p>(Number 1 for the largest number 3 for the third largest number of claims denied in <u>this quarter</u>)</p>	<p>Select number 1 for the service with the largest number of claims denied <u>this quarter</u>, number 2 for the second largest number and number 3 for the third largest number. Each claim identified as having an overpayment counts as one automated denial (not the number of demand letters received for automated denials as it is likely there will be more than one claim cited for improper payment in the demand letter).</p> <p>Example: If your hospital is a medical/surgical acute care hospital and you only experienced outpatient automated claim denials <u>this quarter</u> then you would choose number 1 as Medical/Surgical Acute Care Hospital – Outpatient and leave the rest blank. If you had 35 outpatient claim denials and 42 inpatient claim denials, you would rank inpatient as number 1 and outpatient as number 2 and not make any selection in number 3.</p> <p>VNote: The choices for selection include and should be selected based on the hospital type:</p> <ul style="list-style-type: none"> ▪ <i>Medical/Surgical Acute Care Hospital - Inpatient</i> ▪ <i>Medical/Surgical Acute Care Hospital - Outpatient</i> ▪ <i>Medical/Surgical Acute Care Hospital - Psychiatric Services</i> ▪ <i>Medical/Surgical Acute Care Hospital - Inpatient Rehabilitation</i> ▪ <i>Medical/Surgical Acute Care Hospital - Skilled Nursing</i> ▪ <i>Medical/Surgical Acute Care Hospital - Other (i.e., Physician Services, DME)</i>

RACTracsupport@providerpcs.com or 1-888-722-8712

RACTrac Question (As they appear on the Survey)	User Definition	Vendor Notes (VNote) and Comments
<p align="center">Definitions of Automated Denial Reasons for Question 7, 8 and 9 – Automated</p> <p><i>NOTE: Reasons for denial are hospital type and services based. For example, a user can be associated with a Medical/Surgical Acute Care Hospital and still have denial reasons in the Inpatient Rehabilitation Hospital/Services area due to a distinct part unit. Please contact RACTracsupport@providerpcs.com if you have questions.</i></p>		
Medical/Surgical Acute Care Hospital/Services - Duplicate Payment	Use this reason code to note more than one claim was paid for the same service by the Medicare claims processor (e.g. two appendectomies billed for the same patient on the same day.)	
Medical/Surgical Acute Care Hospital/Services – Incorrect Discharge Status	Use this reason code to note an incorrect discharge status on the original claim and therefore cited for inaccurate payment. For example, the claim indicates discharge to home or other facility but a subsequent claim for the same patient on the same day shows that the beneficiary was discharged to another hospital.	
Medical/Surgical Acute Care Hospital/Services –Inpatient Coding (MSDRG)	Medicare has now moved to MS-DRGs so what the RACs may or may not find with regard to automated reviews of inpatient claims is currently undefined. Use this reason code to note incorrect ICD-9 codes on the claim.	
Medical/Surgical Acute Care Hospital/Services –Outpatient Coding	Use this reason code to denote an error in HCPCS code assignment or other outpatient coding related error.	
Medical/Surgical Acute Care Hospital/Services – Outpatient Billing	Use this reason code to note incorrectly billed units or charge issues as well as misuse or incomplete billing modifiers. Examples include but are not limited to incorrect billing of the drug Neulasta, or outpatient speech therapy units billed incorrectly.	
Medical/Surgical Acute Care Hospital/Services – All Other	Use this reason code for any denial reason that is not currently captured for your organization type. Please “contact us” and tell us about this reason for denial.	
Inpatient Rehabilitation Hospital/Unit- Duplicate Payment	Use this reason code to note more than one claim was paid for the same service by the Medicare claims processor.	
Inpatient Rehabilitation Hospital/Unit –Inpatient Rehabilitation Coding Error (CMG)	Use this reason code to denote inappropriate codes leading to incorrect billing of the case mix group (CMG) on the inpatient rehabilitation claim.	
Inpatient Rehabilitation Hospital/Unit – All Other	Use this reason code for any denial reason that is not currently captured for your organization/service types. In addition to selecting this reason code, please use the “contact us” link on this page and tell us about the more specific reason for denial.	
Psychiatric Hospital/Unit-Duplicate Payment	Use this reason code to note more than one claim was paid for the same service by the Medicare claims processor.	
Psychiatric Hospital/Unit – Inpatient Psych Coding (MSDRG)	Medicare has now moved to MS-DRGs so what the RACs may or may not find with regard to automated reviews of inpatient claims is currently undefined. Use this reason code to note incorrect ICD-9 codes on the claim.	
Psychiatric Hospital/Unit – All Other	Use this reason code for any denial reason that is not currently captured for your organization/service type. In addition to selecting this reason code, please use the “contact us” link on this page and tell us about the more specific reason for denial.

RACTracsupport@providercs.com or 1-888-722-8712

RACTrac Question (As they appear on the Survey)	User Definition	Vendor Notes (VNote) and Comments
Overpayments – Complex		
<input type="checkbox"/> Check here if your hospital Has not had any complex denials. (If checked, skip to Medical Necessity Denials)	By checking this box, you are indicating that your hospital is not tracking complex claim denial experience at the present time.	Noted in Status Report
1. Total number of medical record requests received	The total cumulative number of medical records requested for complex review to date. The RAC will send a letter (via US Mail) requesting the medical record for review. Please tally the number of medical records from these requests to date and indicate the total here.	VNote: Please do not include medical record requests that have been rescinded. We collect data on rescinded record requests in the Administrative Burden section of the survey.
1a. Total medicare reimbursement dollar value of the claims associated with the medical records requested	Each medical record requested has an original Medicare reimbursement payment amount associated with the claim for that patient. Total the original Medicare reimbursement payment amounts for each of the claims associated with the medical record requested.	VNote: We are not asking for billed charges, rather the Medicare reimbursement received for the claim.
2. Total number of medical records where NO improper payment was identified	The RACs have 60 calendar days to make a determination of whether or not an inappropriate payment has been identified once the medical record has been received. <i>Some hospitals have noted that RACs have gone beyond this determination timeframe.</i> Once the RAC has made its determination, a hospital will be notified via a review results letter. Please indicate the total number of medical records for which you have been notified to date that NO improper payment has been identified.	VNote: An underpayment could be found upon review of a medical record. Underpayment, or determinations with a return of dollars to the hospital, should solely be counted in the Underpayment section. VNote: We collect data on RACs that have gone beyond the 60 day determination period in the Administrative Burden section of the survey.
2a. Total medicare reimbursement dollar value of medical records where NO improper payment was identified	Total the original Medicare reimbursement payment amounts for each of the claims associated with the medical records where NO improper payments were identified	VNote: We are not asking for billed charges, rather the Medicare reimbursement amount received for the claim.

MAY 2012**

Contact RACTrac Support with Questions:
RACTracsupport@providercs.com or 1-888-722-8712

RACTrac Question (As they appear on the Survey)	User Definition	Vendor Notes (VNote) and Comments
3. Total number of medical records where an overpayment was identified (i.e. denied)	The RACs have 60 days to make a determination of whether or not an improper payment has been identified once the medical record has been received. <i>Some hospitals have noted that RACs have gone beyond this determination timeframe.</i> Upon that determination, a hospital will be notified via a review results letter if an improper payment was found and therefore the associated claim has been “denied”. Please indicate the total number of medical records for which you have been notified to date that an improper payment has been identified and therefore a claim, either in part or in total has been “denied”. The official notification of an overpayment should be based on the receipt of the demand letter, not the review results letter. Please count the number based on the number of the demand letters received, not the number of review results letters received.	VNote: We are not asking for billed charges, rather the Medicare reimbursement amount received for the claim. VNOTE: Due to the nature and timing of the discussion period it is possible that a provider would receive a review results letter without the demand letter at the point of RACTrac reporting. Please only enter denials for which a demand letter has been received. We collect data on untimely demand letters in the Administrative Burden section of the survey.
3a. Total medicare reimbursement dollar value of medical records in which an overpayment was identified (i.e. denied)	Total the <u>original payments</u> for each of the claims associated with the medical records that were denied.	
4. Total number of medical records pending determination by the RACs	The number of medical records that are “pending determination” are those for which the provider has not been notified via a review results letter (approval, no overpayment) or demand letter (overpayment) of the outcome of the review. Total number of medical records pending determination = Total number of medical records requested minus total number of medical records approved minus total number of medical records denied .	It will include medical records for which the request has been received, but the documentation has not yet been submitted to the RAC.
4a. Total medicare reimbursement dollar value of medical records pending determination	Total the original payments for each of the claims associated with the medical records that are pending determination. Total dollar value of medical records pending determination = Total dollar value of medical records requested minus total dollar value of medical records approved minus total number of medical records denied.	
5. Estimate the total dollars associated with the overpayments identified during medical record review (complex claim denials)	The value of the overpayment is communicated via the demand letter from the RAC following the review results letter indicating an improper payment. Indicate the total dollar value for all over payments identified in the demand letter.

RACTracsupport@providercs.com or 1-888-722-8712

RACTrac Question (As they appear on the Survey)	User Definition	Vendor Notes (VNote) and Comments
Definitions of Complex Denial Reasons for Question 10, 11 and 12 – Complex		
<i>NOTE: Reasons for denial are hospital type and services based. For example, a user can be associated with a Medical/Surgical Acute Care Hospital and still have denial reasons in the Inpatient Rehabilitation Hospital/Services area due to a distinct part unit. Please contact RACTracsupport@providercs.com if you have questions.</i>		
Medical/Surgical Acute Care Hospital/Services – No Documentation Provided or Insufficient Documentation in the Medical Record	Use this reason code to denote when a RAC request a medical record from the provider and the provider either failed to respond within the appropriate time limit (45 calendar days) or failed to send the complete medical record. This is often referred to as a “technical denial.”	
Medical/Surgical Acute Care Hospital/Services– Incorrect MS-DRG or Other Coding Error	Use this reason code to denote that upon review of the medical record the RAC determined that an incorrect MS-DRG assignment was made based on the documentation provided.	
Medical/Surgical Acute Care Hospital/Services – Incorrect APC or Other Outpatient Coding Error / Outpatient Billing Error	Use this reason code to denote when a RAC determines that there has been improper billing related to APC assignment, fee-schedule based HCPCS assignment, or other outpatient coding.	
Medical/Surgical Acute Care Hospital/Services – Short Stay Medically Unnecessary	Use this reason code to denote a denial that generally pertains to acute inpatient stays of 1 to 3 days, often referred to as a short stay denial. Examples of these types of denials during the demonstration included but were not limited to patients with pacemaker/surgical procedures, chest pain, back pain, congestive heart failure, and gastroenteritis.	
Medical/Surgical Acute Care Hospital/Services – Medically Unnecessary Inpatient stay Longer than 3 Days	<p>Use this reason code to denote a denial that may include the following justifications for care being determined medically unnecessary:</p> <ul style="list-style-type: none"> • Inpatient service provided should have been done in the outpatient setting • Inpatient should have been observation • No medical necessity for inpatient admission • Level of care not met for inpatient admission • If the reason is cited that it’s Medically Unnecessary and it is not a short stay case as defined above, then it belongs in this category. <p>Please note that more than one procedure occurring on the same day AHA classifies as an duplicate payment – not medically unnecessary as defined in coverage guidelines etc. (e.g. 3 appendectomies in one day, while not medically necessary is really a duplicate payment and should be cited as such.)</p>	
Medical/Surgical Acute Care Hospital/Services – Other Medically Unnecessary	Use this reason code to denote other denials that are not mentioned above or are for more clinical reasons rather than utilization of services reason.

MAY 2012**

Contact RACTrac Support with Questions:
RACTracsupport@providercs.com or 1-888-722-8712

Medical/Surgical Acute Care Hospital/Services – Incorrect Discharge Status	Use this reason code to note an incorrect discharge status on the original claim and therefore cited for inaccurate payment. For example, the claim indicates discharge to home or other facility but a subsequent claim for the same patient on the same day shows that the beneficiary was discharged to another hospital.	
Medical/Surgical Acute Care Hospital/Services – All Other (Enter in text box below)	Use this reason code to denote if the above mentioned denial reasons are in no way related to the current denials you are experiencing. Please also contact AHA via our “contact us” email and let us know about the types of denials you are experiencing so that we can consider tracking them in RACTrac.	
Inpatient Rehabilitation Hospital/Unit – No Documentation Provided or Insufficient Documentation	Use this reason code to denote when a RAC request a medical record from the provider and the provider either failed to respond within the appropriate time limit (45 calendar days) or failed to send the complete medical record. This is often referred to as a “technical denial”.	
Inpatient Rehabilitation Hospital/Unit – Incorrect CMG or Other Coding Error	Use this reason code to denote that upon review of the medical record the RAC determined that an incorrect case mix group (CMG) assignment or other coding error was made based on the documentation provided.	
Inpatient Rehabilitation Hospital/Unit – All Joint Patients: Medically Unnecessary	Use this reason code to denote when an inpatient rehabilitation service provided to a <u>joint patient</u> that was deemed medically unnecessary for any of the following reasons including but not limited to: <ul style="list-style-type: none"> • Documentation does not support the need for 24-hour rehab nursing • Documentation does not support the need for 24-hour medical supervision • Documentation does not show a coordinated care plan • Documentation does not show a significant practical improvement • Patient could have been served in a less intense setting • Documentation does not support that therapy services were of relatively intense level of service • Documentation does not reflect realistic goals/progress toward established goals 	
Inpatient Rehabilitation Hospital/Unit – Other Medically Unnecessary	Use this reason code to denote when inpatient rehabilitation was denied as medically unnecessary. There are seven criteria outlined in the Medicare Coverage Guidelines to assist providers in determining whether or not care in an IRF setting is clinically appropriate. Reasons for denial under this category include the following. <ul style="list-style-type: none"> • Documentation does not support the need for 24-hour rehab nursing • Documentation does not support the need for 24-hour medical supervision • Documentation does not show a coordinated care plan • Documentation does not show a significant practical improvement • Patient could have been served in a less intense setting • Documentation does not support that therapy services were of relatively intense level of service • Documentation does not reflect realistic goals/progress toward established goals

RACTrac Question (As they appear on the Survey)	User Definition	Vendor Notes (VNote) and Comments
Underpayments		
<input type="checkbox"/> Check here if your hospital has not had any underpayments. (If checked, skip to Appeals.)	By checking this box, you are indicating that your hospital is not tracking underpayment experience at the present time.	
1. Total cumulative number of claims identified as underpayments	The RACs run Medicare claims through proprietary software to find potentially improper payments; this may include scenarios where the provider was paid less than the appropriate amount for the service. Alternatively, a provider may have an underpayment detected upon medical record review or complex review. Please total the number of claims (automated or complex) that were identified as an underpayment by the RAC.	
2. Estimate of total cumulative Medicare reimbursement dollars determined to be underpayments	The RAC will identify the underpayment on the notification letter and estimate an amount for that underpayment. Please total the estimated dollar value of the underpayment.	VNote: We are not asking for billed charges, nor are we asking for original payment. Please sum the Medicare reimbursement impact from any underpayment notification letters.
3. Total cumulative Medicare reimbursement dollars actually returned to facility	Indicate the actual total dollars returned to the facility to date by the Fiscal Intermediary or Medicare Administrative Contractor.	
<input type="checkbox"/> Check here if your hospital has not had no new activity this quarter. (If checked, skip to Appeals.)		
4. Indicate the reasons identified by the RAC for underpayment <u>this quarter</u>. Check all that apply	The reason(s) provided by the RAC for why claims are identified as underpayments. Below are the choices for this question Billing Error Inpatient Discharge Status Incorrect MS-DRG Outpatient Coding Error All Other	

**AHA RACTrac Survey Questions and Data Definitions
MAY 2012**

Contact RACTrac Support with Questions:
RACTracsupport@providercs.com or 1-888-722-8712

Underpayment Reasons		
Billing Error	Use this reason code to denote an inappropriate payment resulting in an underpayment.	
Inpatient Discharge Status	Use this reason code to denote when a provider billed an inaccurate discharge disposition for the patient. For example, patients who are intended to receive home-health services, but never do for a variety of reasons. In the post-acute care Medicare reimbursement methodology, these patients might otherwise inappropriately trigger a reduction in reimbursement for the hospital.	
Incorrect MS-DRG	Use this reason code to denote when a hospital incorrectly coded a lower paying MS-DRG when the documentation or information on the claim should have resulted in a higher paying MS-DRG.	
Outpatient Coding Error	Use this reason code to denote an error in HCPCS code assignment or other Outpatient coding related error.	Not noted in the demo
All Other	If the reason for the underpayment is not listed here, please check "other" and send AHA an email about the new reasons for underpayments that have been identified above. Please include the number of claims and the dollars associated with that underpayment reason so we can best determine if this is an isolated incident or if your reason should be added to the data we are capturing.	

**AHA RACTrac Survey Questions and Data Definitions
MAY 2012**

Contact RACTrac Support with Questions:
RACTracsupport@providercs.com or 1-888-722-8712

RACTrac Question (As they appear on the Survey)	User Definition	Vendor Notes (VNote) and Comments
Appeals		
1. Total number of appeals filed	<p>The total (cumulative) number of appeals filed for claims denied through the automated and complex review processes. An appeal is NOT a rebuttal to the RAC but rather an appeal filed to the Fiscal Intermediary (FI) for redetermination (or for some the Medicare Administrative Contractor (MAC)). Each claim filed with the FI or MAC counts only once regardless of the number of levels of appeals it goes through.</p> <p><i>Regardless of whether or not this claim was identified through the automated or complex process, if it was appealed it should be noted here.</i></p>	VNote: Once it has been appealed to the FI or MAC then that appeal only counts once.
1A. Total medicare reimbursement dollar value of the denials filed for appeal	<p>Please indicate the estimated total dollar value of all your denied claims filed for appeal to the FI or MAC to date.</p> <p><i>Regardless of whether or not this claim was identified through the automated or complex process, if it was appealed it should be noted here.</i></p>	VNote: Dollar value of a denied claim is what was indicated on the demand letter.
2. Total number of appeals overturned in favor of the provider at any level of the appeals process	<p>Once a claim has been appealed, it can be overturned at any level of the appeals process (FI, QIC, ALJ, MAC etc.). Please indicate the total number of claims that have been successfully overturned in favor of the provider at any level to date. (This does not include any rebuttals to the RACs that were then overturned in favor of the provider.)</p>	
2A. Total medicare reimbursement dollars of appeals that have been overturned in favor of the provider at any level of the appeals process	<p>Once a claim has been appealed, it can be overturned at any level of the appeals process (FI, QIC, ALJ, MAC etc.). Please indicate the estimated total dollars associated with all the claims that have been successfully overturned in favor of the provider to date. (This does not include any denials overturned in the discussion period.)</p>	VNote: In the AHA RACTrac claim tool the dollar value is pulled from the value stated on the demand letter. However, any appeal entity can issue a fully favorable or partially favorable finding. Ideally vendors should capture the actual dollar value as AHA's tool could over estimate the dollars returned.
3. Total number of appeals that were initially filed to the FI/MAC and then withdrawn or stopped by the provider at any level of the appeals process	<p>Please indicate the total number of appeals that were initially filed to the FI or MAC and then withdrawn or stopped by the provider at any level of the appeals process. Most often these are appeals that the provider only pursued to a certain level and then made a determination that it was no longer worth pursuing further and the denial remains upheld. Several reasons may justify this decision including but not limited to: not enough documentation to support an appeal moving forward, the dollar value of the claim is not enough to warrant the cost of a lengthy appeals process, the hospital missed a deadline for filing an appeal to get it to the next step in the process, not enough resources to appeal every claim, or the merits of the case do not warrant pursuing the appeal further.</p>	

**AHA RACTrac Survey Questions and Data Definitions
MAY 2012**

Contact RACTrac Support with Questions:
RACTracsupport@providercs.com or 1-888-722-8712

RACTrac Question (As they appear on the Survey)	User Definition	Vendor Notes (VNote) and Comments
3A. Total medicare reimbursement dollar value of the appeals that were initially filed to the FI/MAC and later withdrawn from the process or not continued	Please indicate the estimated total dollar value of appeals that were initially filed to the FI or MAC and then withdrawn or stopped by the provider at any level of the appeals process. The dollar value is indicated on the demand letter.	
4. Total number of appeals currently in process	These appeals have been filed and are currently in process at various levels of the appeals process. They have not been overturned or withdrawn or stopped for any reason.	
4A. Total medicare reimbursement dollar value of the appeals currently in process	These appeals have been filed and are currently in process at various levels of the appeals process. They have not been overturned or withdrawn or stopped for any reason. Indicate the estimated dollar value of these appeals in process.	
5. Average administrative cost per appeal (cost associated with the appeals process)	Enter the costs incurred as a result of appealing RAC denials. Enter the average administrative (including legal costs) cost per appeal.	VNote: There are many different costs associated with pursuing the Medicare Appeals Process. The types of costs (staff time, legal costs, copying costs, etc) vary by hospital. Please indicate the average cost of pursuing the appeals process per appeal.
6. For the appeals filed <u>this quarter</u>, please indicate the services in which the denials occurred.	Appealed claims can fall in any number of service areas of the hospital. For question 6A, your hospital type has been pre-selected based on your answer to the Overpayments (automated section).For question 6B please indicate the services in which automated and complex RAC denials have occurred for your hospital this quarter.	VNote: If you do not have new appeals activity this quarter, please skip these questions and go to the Administrative Burden section.
7. For the appeals filed <u>this quarter</u>, please indicate the denial reasons cited on those claims. (Check all that apply)	On the correspondence from the RAC to the provider, the RAC indicates the reason for the overpayment. AHA has broadly categorized selected reasons by hospital type that were identified during the demonstration program. Please read carefully through each of the denial reasons to determine ANY and ALL categories which reflect the reason for appeal for this quarter . The denial reasons for both automated and complex are noted in the Automated and Complex sections above.

RACTracsupport@providercs.com or 1-888-722-8712

RACTrac Question (As they appear on the Survey)	User Definition	Vendor Notes (VNote) and Comments
8. For those appeals <u>this quarter</u> that have been overturned in favor of the provider, please indicate the reason for the overturn. (Check all that apply).	AHA has broadly categorized reasons for the overturn determination on appeal, representing a win for the hospital. Please select ALL categories which represent the basis for the overturn decision on a RAC appeal, appreciating that more than one selection may apply. Please notify AHA if a reason is not represented for the overturn determinations experienced by the hospital.	
Appeal Overturn Reasons		
Additional information provided by the hospital substantiated the claim.	In the first 2 stages of appeal (FI and QIC), the hospital may introduce additional, relevant information and/or documentation to support the admission, DRG assignment, coding and/or services delivered.	
The RAC made an error in its determination process.	The RAC gave an inaccurate determination which can be referred to as "no good cause".	
Care provided was found to be medically necessary	The RAC's finding of care being medically unnecessary was not supported by the documentation or evidence provided.	
The claim is currently under review by a different auditor(s)	The claim is undergoing a secondary review.	
Other	If your reason for having an appeal overturned is not cited, please indicate it here. In addition, please contact AHA via our "contact us" email and let us know about the denials you are experiencing so that we can consider tracking them in RACTrac.

RACTrac Question (As they appear on the Survey)	User Definition	Vendor Notes (VNote) and Comments
<p>6B. If yes, how effective was this education in helping your facility identify and correct issues that might lead to future RAC denials?</p>	<p>Please indicate the effectiveness of this education by selecting either Excellent, Good, Fair, Poor or No Opinion.</p>	
<p>7A. Have you had any RAC denials overturned during the discussion period?</p> <p>7B. If yes, how many?</p>	<p>7A. Please indicate whether you have had any denials overturned by the RAC during the discussion period.</p> <p>All RACs are required to allow a discussion period in which a hospital may share additional information and discuss the denial with the RAC. During the discussion period a hospital may gain more information from the RAC to better understand the cause for the denial and the RAC may receive additional information from the hospital that could potentially result in the RAC reversing its denial. The discussion period happens before the appeals process and is not a formal part of the Medicare Appeals Process.</p> <p>7B. If you have had denials overturned in the discussion process, please indicate how many.</p>	
<p>8A. Please select from the following issues that you experienced during the previous calendar quarter.</p> <p>8B. If Other issues/problems was selected, please provide details here.</p>	<p>Select each of the following issues your experienced with your RAC during the previous quarter.</p> <p>Full list of choices for question 8A.</p> <ul style="list-style-type: none"> • RAC is auditing a particular MS-DRG or type of claim that is not approved by CMS • RAC is mailing medical record requests to wrong hospital or wrong contact at your hospital • RAC is rescinding medical record requests after you have already submitted the records • RAC is auditing claims that are older than the 3 year look-back period • RAC is issuing more than one medical record request within a 45-day period • RAC is not meeting 60-day deadline to make a determination on a claim 	<p>VNote: Please only select the issues you experienced during the previous calendar quarter. We are attempting to determine which issues are ongoing and which issues have been resolved.</p> <p>A rescind is the decision by the RAC contractor to not continue with the targeting of a requested medical record. It occurs after you have received a request for documentation, but you do not receive a determination notice (because it has been stopped, or rescinded) from the RAC contractor.</p>
