

Fairfield Medical Center, Lancaster, OH

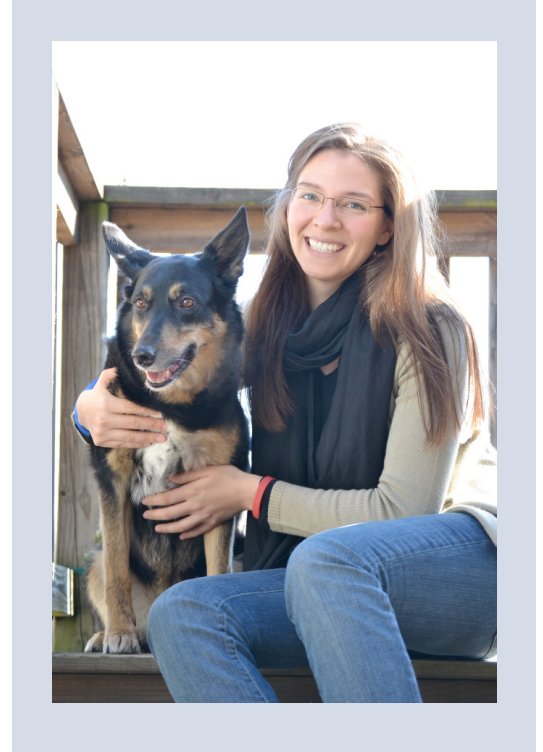

Misty Morrison

This is an amazing story of a journey of physical healing and we feel so much a part of her miraculous journey.

Misty is a young lady who came in flatlined to our emergency department at age 27. She was a college student who had moved back to Ohio to work on her master's degree. She was employed part-time and had no insurance – low income and unable to pay for health care services.

Misty ended up staying at Fairfield Medical Center for eight days and multiple services several months after that eventful ED visit.

The financial representative started working with her family, even before Misty was able to speak, looking at every opportunity to resolve the financial burdens so everyone's focus could be on Misty's recovery. The hospital was able to provide 100 percent financial assistance for all of her hospital services for the initial stay and the multiple services after she was released to go home. Her financial assistance amounted to more than \$73,000.

Misty writes:

“Barbara,

Thank you so much for your help, support, and care during this completely crazy time! I don't know what I would have done without you.

 Misty”
