

Expanding and Improving Access to Primary Care

Hays Medical Center, KS

First Care Clinic, Hays, KS

- HaysMed has supported FCC for over ten years as a partner, not a competitor.
- FCC began as a free clinic staffed one night per week until demand exceeded supply; the clinic hours were then expanded.
- The leadership of HaysMed and FCC saw an opportunity to complement one another with FCC providing primary care, dental care and mental health services and HMC providing the balance of imaging, lab and other ancillary services to the community.
- Open lines of communication between the leaders of each provider organization have enhanced patient services and processes to the advantage of the community.
