3M™ Audit Expert RAC Management Tool 3M Health Information Systems	John Garrett	3M Health Information Systems 575 West Murray Blvd. Salt Lake City, UT 84123 801-265-4329 jbgarrett@mmm.com	Compatible
<p>Product Description (submitted by vendor)</p> <p>The RAC Management Tool in the 3M™ Audit Expert software helps to improve an organization's ability to respond quickly and efficiently to Recovery Audit Contractor (RAC) requests, defend claims through the appeals process, and identify and understand any areas of risk in both the inpatient and outpatient settings. As part of 3M Audit Expert, providers can help reduce their risk of RAC audits by reviewing 100 percent of inpatient records for compliance errors at the point of coding. Customizable coding alerts, retrospective auditing capabilities, and the ability to trend a facility or health system against national norms (e.g., PEPPER and MedPAR) are also risk prevention features of 3M Audit Expert.</p> <p>The RAC Management Tool functions allow providers to:</p> <ul style="list-style-type: none"> ▪ Log record requests while automatically populating timelines and the associated requirements, if you are pursuing multiple levels of appeal ▪ Eliminate redundant data entry with access to coded data, demographics, and payer information ▪ Streamline workflow by creating worklists to guide response activities ▪ Improve communication among the RAC team members by granting access to multiple users ▪ Store valuable information, including the types of issues identified for re-opening claims, the amount of take-backs and associated reasons, and each level of appeal and outcome ▪ Proactively identify potential RAC issues through trending with pre-determined and customizable reports <p>3M goes beyond simply tracking RAC activity. The 3M™ RAC Ready Program tackles the underlying issues that may lead to improper payments now and in the future. The program helps to identify vulnerabilities with a baseline assessment, manage inappropriate short stay admissions by improving case management processes; and addresses coding accuracy with 3M Audit Expert software. With more than 25 years of healthcare experience and expertise, 3M Health Information Systems can help you be RAC Ready now and in the future. To learn more about the 3M RAC Ready Program visit www.3Mhis.com/racs.</p>

ClickON® RADs The SSI Group, Inc.	Marketing Department	The SSI Group, Inc. contact@ssigroup.com toll free: 800-881-2739	Compatible
<p>Product Description (submitted by vendor)</p> <p>SSI's ClickON® RADs (Recovery Audit Defense system) is the answer to Medicare's Recovery Audit Contractor (RAC) audit process. RADs has been built on a Document Management System (DMS) Claims Attachment engine platform. The DMS product has been in use for several years and the RADs product is a robust solution for tracking all facets of the RAC process. By using DMS tools, RADs automatically captures claim and remit images, and automates medical record requests through workflow routing. It imports or allows scanning of the medical record and tracks the RAC encounter from the initial letter through the entire appeals process. The system has alerts to keep organization from missing important deadlines. Plus, it has full reporting and enhanced security to restrict access for intended users only. RADs is a great RAC solution! It can handle more than just Medicare audits—it can be expanded to cover audits from almost any source.</p> <p>Features</p> <ul style="list-style-type: none"> ★ Document, store and track RAC audit requests and appeals ★ Automatically import, index and store ANSI 837 claims and ANSI 835 remits related to requested cases ★ Capture scanned images of the RAC request letter, determination letters and other documentation arriving during the review and appeal process ★ Customized workflows to route each case through Medical Records, Patient Financial Services, Compliance, Legal and any other location needed in the process ★ Provides a secure and centralized location for all RAC related documents— eliminates lost paperwork ★ Date and time stamped activity to allow tracking of the encounter through the entire audit and appeal process ★ Deadline calculation and tracking ★ <i>System alerts: Users are notified when a record is approaching a deadline - Important events are almost impossible to miss</i> ★ <i>System reporting shows the exact location of each encounter, the path it has followed, and the duration of each stop along the way</i> ★ Deliver documentation to the RAC or appellate entity in the manner they prescribe; CD/DVD, print, fax or electronically ★ UPS and FedEx tracking ★ Automated AHA RACTrac reporting

RAC Guard The Wellington Group LLC	Scott Earich Principal	6133 Rockside Road, Suite 205 Independence, OH 44131 216-525-220 ext. 215 searich@wellingtongroup.biz www.wellingtongroup.biz	Compatible
<p>Product Description (submitted by vendor)</p> <p>The Wellington Group, LLC is a healthcare consulting and software solutions firm that helps hospitals nationwide to improve their financial and operational performance.</p> <p>RAC Guard is a web based software solution that addresses the entire RAC life cycle – Assessment, Tracking, Claim Review, Document Repository AND Prevention.</p> <p>Assessment – Wellington consultants using the RAC Guard tool analyze historical claims data using RAC criteria to estimate your potential financial exposure and identify areas of greatest vulnerability.</p> <p>Document Repository - All documents associated with the RAC process can centrally stored for easy retrieval.</p> <p>Tracking – RAC Guard tracks requests from the time of receipt through the entire appeal process. User's can define tasks and personnel assignments. The software notifies staff of upcoming request and task deadlines, so you won't lose revenue due to missed deadlines.</p> <p>Claim Review - The vulnerability analysis can be used to guide internal reviews, audits and correction of current processes. RAC Guard enables the user to extract a sample set of claims from an area of vulnerability for auditing and tracks the results. The software supports routine audits of target areas and reporting of audit results over time provides a key performance-monitoring tool.</p> <p>Reporting - RAC Guard has full complement of drill down reports for reviewing claim and appeal status, claim audits, upcoming deadlines, summarizing costs, payouts, etc.</p> <p>Prevention – RAC Guard and Wellington's Ambulatory Revenue manager analyzes claims on a daily basis and identifies claims with potential over and under payment issues. The process identifies claims that are likely to be selected for RAC automated or complex reviews. Identifying these claims gives the hospital the ability to correct the claim BEFORE it is submitted.</p>

TRACK+ Array Software	David Henshaw	Array Software 540 Meadow Street Agawam, MA 01001 413-789-2600 dhenshaw@arraysoftware.com	Compatible
<p>Product Description (submitted by vendor)</p> <p>TRACK+ is the new RAC Audit tracking tool for Meditech® MAGIC hospitals from Array Software. TRACK+ will help define, refine, and standardize your process, and provide tools to manage the process efficiently. TRACK+ is different from all the other RAC management tools because it is able to use its robust integration to automatically pull data from the Meditech® modules including Medical Records, Abstracting, and B/AR to meet the auditors' needs.</p> <p>Built on the proven, mature TASK+ task-management system, TRACK+ has features and enhancements designed expressly for RAC Audits, including:</p> <ul style="list-style-type: none"> ▪ Batch processing of RAC auditors' requests for medical record resulting in each record becoming an individual task. ▪ Auto-assignment to the designated people on the RAC team who need to provide input or perform specific functions related to the task. ▪ Documentation that stays with the RAC task throughout its "lifecycle". ▪ Centrally located data accessible for all RAC team members to review and monitor. ▪ Standard and custom reports are easy to generate to meet internal needs, and the reports support aggregate reporting needs for state/regional and AHA. <p>TRACK+ is written in NPR, so no new hardware is needed for Meditech® MAGIC hospitals, and the software has a familiar MAGIC look and feel for users. TRACK+ can be used for audits for internal uses too, by providing trend tracking for finding and correcting repeat errors, and showing the monetary impact of the RAC Audit.</p> <p>From the moment the RAC auditors' letters are received by the hospital, to the final determination and closing of the case, Array's TRACK+ software will provide a comprehensive tool for maintaining the detailed records required of the RAC process.</p>
