AHA AWARD OF HONOR TO BE PRESENTED TO THE SCHWARTZ CENTER FOR COMPASSIONATE HEALTHCARE

WASHINGTON (April 12, 2012) – The American Hospital Association (AHA) will present its 2012 Award of Honor to the Schwartz Center for Compassionate Healthcare, Boston. The award, presented at the AHA’s Annual Membership Meeting on May 7 in Washington, DC, is given to organizations and individuals in recognition of exemplary contributions to the public’s health and well-being through leadership on major health policy or social initiatives.

The Schwartz Center for Compassionate Healthcare (www.theschwartzcenter.org) is a non-profit organization dedicated to strengthening the relationship between patients and caregivers and promoting compassionate, patient- and family-centered care. Its Schwartz Center Rounds® program allows caregivers at hospitals across the country to come together on a regular basis to discuss the most challenging emotional and social issues they face in caring for patients. The principle is that caregivers are better able to make personal connections with patients, families and colleagues when they have greater insight into their own feelings and emotions.

“The AHA is pleased to honor the Schwartz Center for Compassionate Healthcare for recognizing the needs of the women and men on the frontlines of care,” said AHA President and CEO Rich Umbdenstock. “Nurses, physicians and other caregivers may feel the need to be

-more-
strong for their patients and not allow their stress or feelings to show. The Schwartz Center Rounds provide an important opportunity to address their concerns and, ultimately, create a better care experience for patients.”

Schwartz Center Rounds are currently held at 245 hospitals and other health care sites in 35 states and at 11 hospitals in the United Kingdom. Panelists from diverse disciplines participate in the Rounds, including physicians, nurses, social workers, psychologists, allied health professionals and chaplains. After listening to a panel’s brief presentation on a specific case or topic, caregivers in the audience are invited to share their own perspectives on the case and broader related issues.

A comprehensive evaluation has shown that caregivers who attend multiple Rounds sessions report increased feelings of compassion toward patients and increased readiness to respond to patients’ and families’ needs. The program has also been found to improve teamwork, interdisciplinary communication, and appreciation for the roles and contributions of others.

The Center reflects the vision of Ken Schwartz, a Boston health care attorney who died of lung cancer at the age of 40 and found that what mattered most to him as a patient was the compassionate care he received from his caregivers. He founded the Schwartz Center in 1995 – just days before his death – to ensure that all patients receive compassionate care.

Ronald McDonald House Charities, in Oak Brook, Ill., also will receive the 2012 AHA Award of Honor.

PreviousAward of Honor winners include organizations such as the Center to Advance Palliative Care, The Institute for Safe Medication Practices and Habitat for Humanity.
