

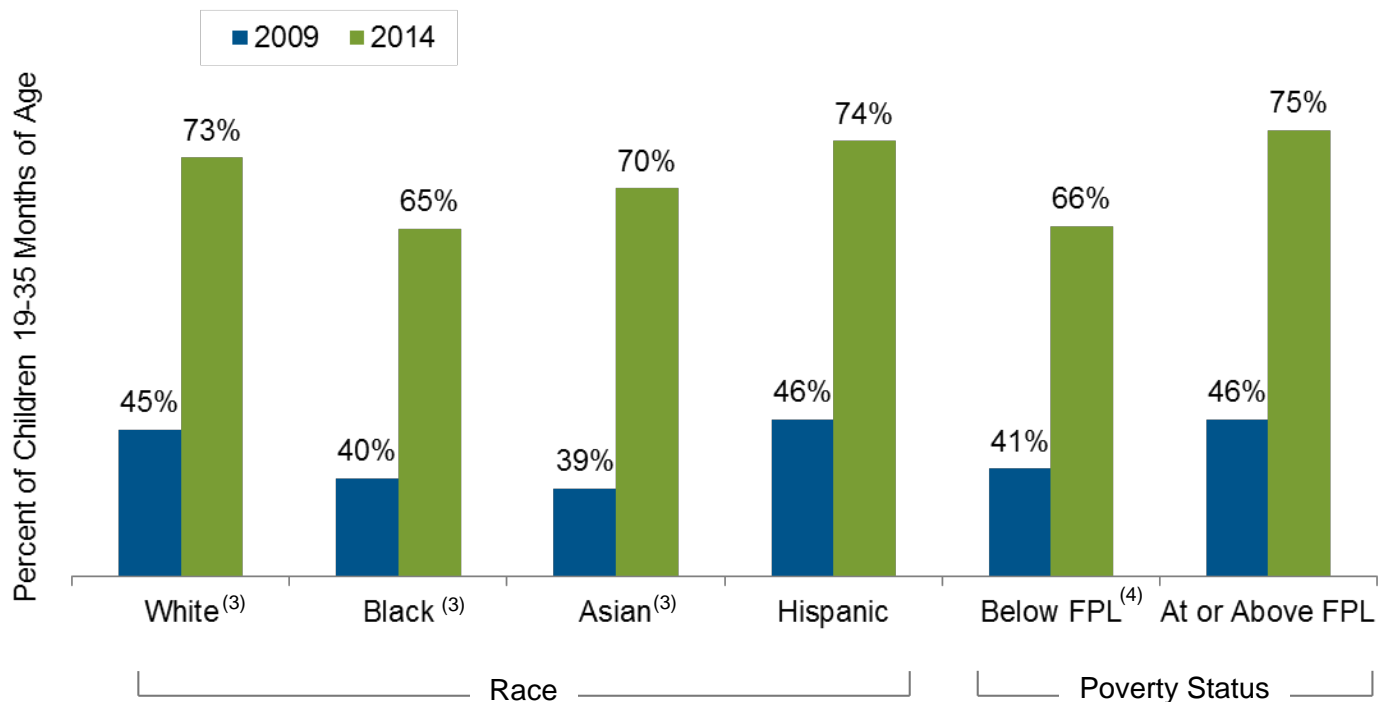

Chart 7.21: Percent of Children Vaccinated<sup>(1)</sup> by Race, Poverty Status, 2009<sup>(2)</sup> and 2014

Source: National Center for Health Statistics. (2016). *Health, United States, 2015*. Hyattsville, MD.

(1) Vaccinations include DTP, Polio, MMR, Hib, Hepatitis B, Varicella and PCV.

(2) Classification methodology changed for the Influenza Type B vaccine—before January 2009, NIS did not distinguish between Hib vaccine product types, so children who received three doses of the vaccine that required four doses were misclassified as fully vaccinated.

(3) Includes individuals of non-Hispanic origin only.

(4) FPL = federal poverty level.
