**SYSTEM-AFFILIATED**

While 68% of all U.S. community hospitals are system-affiliated, only half of rural hospitals are part of a system.

**INVESTOR-OWNED**

Most investor-owned rural community hospitals are system-affiliated. State/local government rural community hospitals are least likely to be part of a system.

**CRITICAL ACCESS HOSPITALS**

Critical access hospitals are somewhat less likely to be system-affiliated than all rural community hospitals, while rural referral centers are more apt to be in a system.

**NONGOVERNMENT NONPROFIT**

Most system-affiliated, rural community hospitals are nongovernment nonprofit facilities.
