

# AHA Annual Survey 2024

## Test Hospital (6432320)

Anytown, State

Dear Colleague,

Thank you for completing the 2024 American Hospital Association (AHA) Annual Survey.

We appreciate the time and effort you have put into its completion and have created personalized reports for your hospital.

The following four reports contain data from your hospital, compared with data from other hospitals that have completed the AHA 2024 Annual Survey.

In these reports and their descriptions below, “current survey year” refers to the 2024 survey year, and “previous survey year” or “last survey year” refers to the 2023 survey year.

1. **Hospital Summary Report (pages 1-7)**: A comprehensive summary of your hospital’s key characteristics, including accreditations, ownership type, primary service type, facilities and staffing data, and primary and general services.
2. **Hospital Profile Report (page 8)**: A profile of your hospital, comparing your current survey year's data with the previous survey year's, as well as benchmarking against similar (or “peer”) hospitals (based on their data from the previous survey year).
3. **Hospital Trend Report (pages 9-10)**: A 5-year overview of reported key metrics for your hospital, designed to help you identify trends and track changes in activity or reporting over time. All data is self-reported (not estimated) and based on your historical submissions.
4. **Hospital Peer Report (pages 11-13)**: A comparison of your hospital's data with that of similar hospitals across your state, your census division, and the entire U.S. This report helps you understand how your hospital measures up to peers with comparable bed size, ownership, and primary service focus.

We value your participation in the AHA Annual Survey and welcome any feedback or suggestions you may have.

We look forward to your continued involvement in future surveys.

Thank you,

*The Survey Team at the American Hospital Association*
